

Attention to the FCC board,

This comment is in reference to the GN Docket No. 13-86. I am very disturbed to hear that there would be any discussion as whether to allow more nudity and filthy language to broadcast over the airwaves!! Hasn't our country been in moral decay long enough? Is there any wonder there is an increase in shootings, homosexuals wanted to be recognized as married; something that God does not condone, and young kids getting hooked on pornography!! Young and innocent children are being exposed to garbage language and taking the Lord's name in vain! If you allow such things to continue and even worsen to the point of allowing this to infiltrate all broadcasting including commercials; all the God-fearing people will have to discontinue watching television!! Please don't allow this filth to put our country into any worse moral decline! You will be held accountable!!

Concerned,

Jody Bradley
